

ENERGY POWER™ BAR ONE

TAKES MINIMUM SPACE/GIVES MAXIMUM SOUND

Most TV's today are incapable of giving you sound quality that even comes close to matching their high definition picture. Some TV's even strain to reproduce the human voice in a legible manner, making it difficult to hear everything in something as basic as a newscast. The Energy Power™ Bar One is a simple solution, "all-in-one", 2.1 soundbar designed to significantly improve all of your television sound!

A SOUNDBAR AND SUBWOOFER IN ONE

Many soundbars use just one small speaker in each side of the main cabinet to try to reproduce all the sounds from 2 separate audio channels. The Energy Power™ Bar One uses, for each channel, one full range driver for midrange and high frequencies and one specialized oval woofer driver for low frequencies. This unique combination gives you detailed high and midrange frequency sound coupled with excellent bass all in one aesthetic cabinet that sits right under your TV. There is no separate subwoofer "box" to find room for, setup and find a separate electrical outlet for.

EASY PLUG AND PLAY SETUP

The Energy Power™ Bar One is designed to quickly connect to most TV's without additional cables. An included digital optical cable connects to your TV's digital output and then to the soundbar. For those few TV's without a digital audio output, there is also a 2-channel analog input and an included 3.5mm to RCA cable for a second connection option. Once the best connection to your TV is made, you just plug the soundbar into a standard electrical outlet and turn it on. You're now ready to enjoy fantastic sound to go with your great picture!

QUICKLY PROGRAM IT TO YOUR TV REMOTE CONTROL OR USE THE INCLUDED WIRELESS REMOTE

You can program the Energy Power™ Bar One's Volume Up and Down and Mute functions into your own TV remote for easy operation from one, familiar control. You also have the option of controlling the same functions, plus bass output, with the included remote control.

SWITCHABLE 3-D SURROUND MODE

The Energy Power™ Bar One features a 3D Surround Mode which adds spaciousness to the sound, simulating the effect of having multiple speakers surrounding you. This feature requires no distinct speaker placement, special room requirements or specific program material to work properly. This effect will work at multiple listening positions in your room.

SOUNDBAR PLACEMENT /WALL-MOUNT FLEXIBILITY

The soundbar can be positioned on its own feet on a shelf or stand or can be wall-mounted using the included easy-to-use template.

SPECIFICATIONS	ENERGY POWER™ BAR ONE
