The New e:XL Series™ Powered Subwoofers

Listen
closer.

e:XL-S12

e:XL-S10

e:XL-S8

The NEW e:XL-Series™ of Powered Subwoofers is a dream come true. With high SPL, and low, low distortion. Plus, they easily handle the wide range of bass output from today's receivers.

Years of dedicated subwoofer development have produced leading-edge amplifier, driver and cabinet technologies. As a result, the bass performance of e:XL-Series™ Subwoofers is unrivalled, as only ENERGY® can deliver.

The new e:XL-S12, boasts a new driver with a 62-ounce (1.76Kg) magnet in its vented cabinet. Its voice coil is a huge 2-inches (51mm). Compare those component sizes to the entire motor structure of competitors.

Major performance upgrades have also been made to the new e:XL-S10 vented 10-inch (25.4cm) model. The new driver's magnet is 28-ounces (800gm), and it has a voice coil diameter of 1½-inches (38mm). The e:XL-S10 is also magnetically shielded for more flexibility in home theater settings.

And, the compact, powerful e:XL-S8 is an upgraded version of the award winning ES-8 acclaimed by critics worldwide.

All models boast high-power MOSFET amplifiers, isolated power supplies, rigid non-resonant cabinet enclosures, the famous ENERGY® Interloc™ bracing systems and outstanding performance to ensure you get the best possible subwoofer money can buy. Together with our completely integrated in-house manufacture and assembly, Energy® achieves the highest build quality, reliability and ruggedness. But the proof truly is in the performance.

Listen closer. Audition the new e:XL-Series™ Powered Subwoofers, today. You'll hear, and feel, the difference.

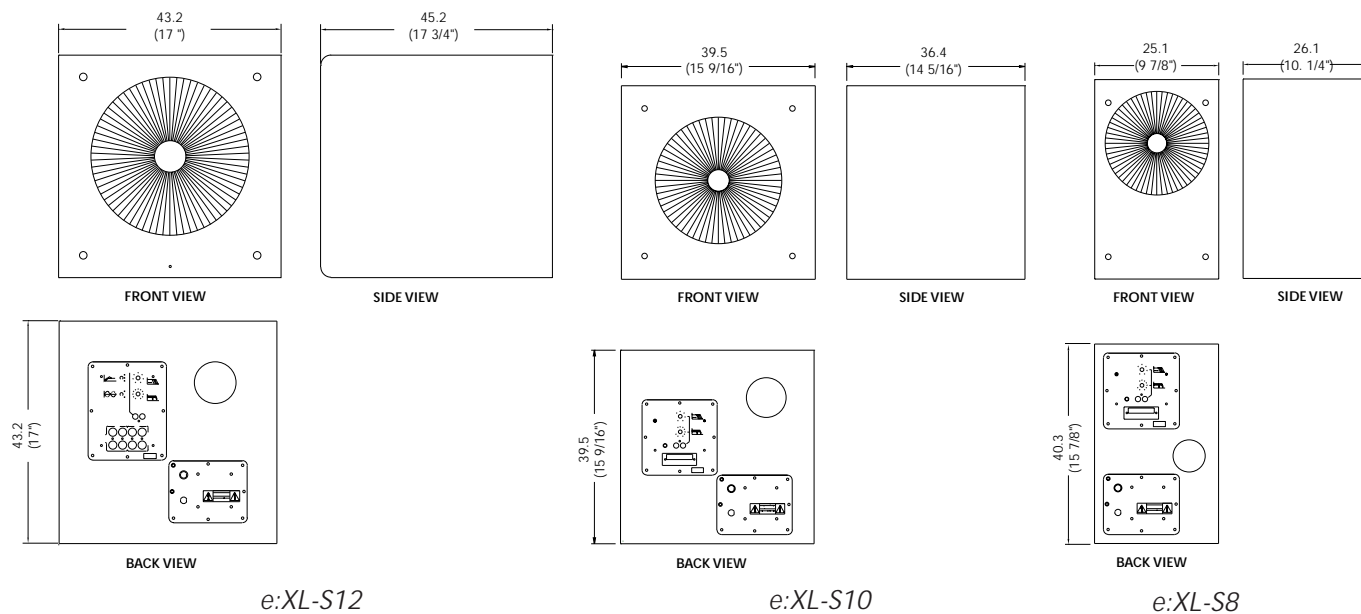

Features and Benefits

- Increased Motor Structure size for clearer, more accurate bass reproduction.
- Higher SPL's, up to 5dB+ more than our competitors, deliver real gut-thumping impact.
- Designed to easily handle the high output voltage signals from new generation receivers.
- The e:XL-S10 is magnetically shielded, and is ideal for close placement home theater applications.
- Rear port for high SPL and low air turbulence.
- No sacrifice in bass quality. Clean, deep and tight. An ENERGY® standard.
