

# ENERGY POWER® BASE

## AN ALTERNATIVE TO THE STANDARD SOUNDBAR

The emergence of the soundbar system as an uncomplicated solution for today's poor flat panel television sound has introduced many to improved performance they would otherwise have missed. The Energy brand has been one at the forefront of providing popular options that vastly enrich sound quality for movies, TV shows and gaming. The Energy Power Base continues that innovation with a compact, high-performance, pedestal-style 2.1 system that provides a new alternative for placement and aesthetics.

## ONE CABINET, ONE CONNECTION

The Energy Power Base system consists of one cabinet, just 4" high, that you can set most flat-panel TV's (up to 80 lbs. with a base up to 23" w x 12" d) directly on. Now, if your TV sits on a stand, countertop, dresser or any other flat surface the Energy Power Base sits directly under it, providing an unobstructed view of the TV screen and, in many cases, a profile that does not block your TV's remote control sensor. The included digital optical cable then quickly connects from the back of the Energy Power Base to the TV, providing a cleaner look. The Energy Power Base's built-in Dolby® Digital decoder provides for a no-hassle setup whether your TV outputs PCM or Dolby Digital sound.

## BALANCED, FULL-RANGE SOUND

A soundbar system should not just be louder than the TV it is connected to, it needs to have a proper sound balance so that dialogue and subtle details are not overpowered by distorted or overblown bass. The Energy Power Base utilizes separate tweeters and midrange drivers for each channel enhanced by dual subwoofers in a bass-reflex cabinet design supported with dual, front-firing ports providing a well-balanced, detailed, full-range sound no matter how it is placed. The switchable 3D surround feature simulates a multiple speaker system.

## BLUETOOTH WIRELESS MUSIC STREAMING

With its *Bluetooth*® wireless technology feature, the Energy Power Base's excellent sound quality can also be used for playback of your digitally stored music. Just turn on the *Bluetooth* wireless technology feature of your smartphone, tablet or computer, connect to the Energy Power Base and wirelessly stream your music for room-filling, truly musical sound.

## ONE REMOTE TO CONTROL YOUR TV AND POWER BASE

You can program the Energy Power Base's Volume Up and Down and Mute functions into your own TV remote for easy operation of everything from one, familiar control. You also have the option of controlling the same functions with the included remote control.

\*See specifications for specific TV size/weight requirements

## SPECIFICATIONS

<b>System Type</b>	3-way system; built-in subwoofer
<b>Power Handling</b>	160 watts peak
<b>Frequency Response</b>	65Hz to 20KHz +/-3dB
<b>Tweeter</b>	Two .78" (20mm) aluminum dome drivers
<b>Midrange</b>	Two 3" (7.6 cm) IMG Drivers
<b>Woofers</b>	Two 3" x 5" (7.62 cm x 12.7 cm) front firing composite cone/ported enclosure
<b>Inputs</b>	<i>Bluetooth</i> , 1 optical input, 1 dual RCA input
<b>Dimensions</b>	4" (10.2 cm) H x 25" (63.5 cm) W x 14.1" (35.8 cm) D
<b>Weight</b>	18.4 lbs / 8.3 kg
<b>Product Finish</b>	Satin Black/Matte Black
<b>Included Accessories</b>	One 4.9 ft (1.5m) digital optical cable, one 4.9ft (1.5m) 3.5mm to dual RCA cable, one remote control
<b>TV Placement Requirements</b>	TV's <80 lbs (36kg) TV base <23" (58cm) W x 12" (30cm) D
